## Introduction to the course

Public health is a discipline that is concerned with the health of the population as a whole. It is a multidisciplinary field that draws on a variety of disciplines, including medicine, biology, sociology, and economics.

The course will provide an overview of the field of public health, including its history, its current role in society, and the various approaches to public health practice. We will also explore the challenges facing public health in the 21st century, and discuss ways in which we can address these challenges.
