

IT Department

This department designs, organises and develops the Hcéres information system to support its evaluation and study activities. To do so, it designs and develops the applications required to collect, file, quality check, disseminate and process the data and information that is necessary for the activities of Hcéres.

Dany Vandromme is acting head of Department.
Evaluation Information System Manager: Jean-Christophe Martin
Studies and Analyses Information System Manager: Corinne Mouradian

Missions

The IT Department works for all the departments, providing comprehensive support for the activities of Hcéres. Its essential missions consist in:

- › drawing up an information system upgrade strategy and a master plan in line with the strategic plan of the High Council,
- › organising information system resources,
- › defining a data policy in order to rationalise and optimise the collection and provision of data,
- › designing and upgrading Hcéres applications in liaison with stakeholders,
- › facilitating the design, provision and processing of Hcéres output,
- › supporting the participation of Hcéres in upgrades of the overall information system for higher education and research in France and in Europe.

The Department is also a stakeholder in the national steering bodies in matters relating to information systems and digital technologies.

7 To

of bibliographic and bibliometric data

30

professional applications to support the missions of Hcéres

19500

evaluation files deposited every 5 years, on average

1,5

billion scientometric indicators calculated each year

600000

files stored for the purposes of evaluations
