President and members of the Hcéres Board appointed

Thierry Coulhon, Hcéres President, is appointed among the 30 members who make up the Board.
European Research Infrastructures: 1st Hcéres evaluation

As the coordinating member of the ERIEC Research Infrastructure Evaluation Consortium, Hcéres has published its first evaluation of a European research infrastructure. It was of ECRIN-ERIC (European Clinic Research Infrastructure Network) and was organised in two key stages: a self-evaluation conducted by ECRIN-ERIC, then an external evaluation by a panel of international experts. The panel recommended more particularly that the ECRIN-ERIC network should open up further to new research and consider collaborations with other European research infrastructures (see pages 24 and 25). It should also be noted that ERIEC welcomed two new quality assurance agencies in 2019: QANU (Netherlands) and evalag (Germany).

Election of François Pernot, Director of the Europe and International Department (DEI) as ENQA Vice-Chair

Hcéres conference: “Evaluation in higher education, research and innovation - review and perspectives: 2015-2025”

Organised by Hcéres under the title “Evaluation in higher education, research and innovation - review and perspectives: 2015-2025”, this very rich event lasted two days and brought together 180 participants for 6 round-table panel discussions (see page 9). “To evaluate is to build confidence,” stressed Frédérique Vidal, Minister for Higher Education, Research and Innovation, who was invited to close the event. Adding that evaluation constitutes “the necessary condition for the autonomy of universities and bodies,” she also pointed out that it is “an integral part of the world of knowledge.” It is also a vector of excellence, but “our community does not cultivate this excellence only for itself, it owes it above all to the society that believes and invests in it,” concluded the minister, reminding us all that evaluation must be useful “to society as a whole.”
Publication of “Dynamics of scientific production in the world, in Europe and in France, 2000-2016”

This report by the OST Department analyses scientific production around the world and in Europe, along with an in-depth look at the case of France. It is based on scientific publications, research resource indicators and an analysis of the international mobility of Nobel prize-winners. In addition to various analyses of the positioning of the research-intensive countries, it offers a particular insight into the impact of the growth in Chinese scientific production on the bibliometric indicators of other countries.

Election of Solange Pisarz, a Project Manager in the Europe and International Department (DEI), as Vice-Chair of the ECA (European Consortium for Accreditation in Higher Education)

French archaeology: publication of the first synthesis and future perspectives report for a scientific discipline

At the request of the Ministry for Higher Education, Research and Innovation and the Ministry for Culture, Hcéres delivered a synthesis and future perspective report, along with proposals to boost the international profile and reputation of French research in archaeology. The report is the first of its kind and describes the 102 research units in the sector of archaeology in France, as well as summarising their theoretical and methodological approaches. In its conclusions, it underscores the outstanding scientific position, efficient organisation and diversified collaborations of French archaeology.

Research integrity and Open Science”: 1st annual seminar of the OFIS

Organised by the OFIS Department in partnership with the CPU, the Committee for Open Science (CoSo), the CNRS and Poléthys (Université ParisSaclay), this seminar had a threefold objective: to share experience and analyses, to identify synergies between research integrity and open science, and to identify the pitfalls to be avoided. With over 170 participants, it provided a forum for rich and constructive debate through its two introductory presentations, followed by two round table panel discussions: “Open access to publications, a challenge for research integrity?” and “Open data, a challenge for research integrity?”

Video highlights of the “Research Integrity and Open Science” Conference

Publication of the first integrated evaluation

HESAM Université is the first cluster of institutions to benefit from an integrated evaluation. It was carried out in two phases (evaluation and then synthesis) with a twofold objective: to deliver a comprehensive view of the collective dynamics of the cluster, and to assess its strengths, weaknesses and development challenges.

Communication on the proper usage of research evaluation criteria

The San Francisco Declaration on Research Assessment (DORA), published in 2012, and the Leiden Manifesto of 2015 both set out to improve existing research evaluation practices, particularly by drawing attention to the misuse of certain bibliometric indicators. In support of the recommendations made in these declarations, Hcéres has decided to issue a statement explaining how their principles are put into action in the context of our work to evaluate research institutions.

Integrated evaluation rolled out

The integrated evaluation system for clusters and their entities is a key focus of the Hcéres Strategic Plan 2016-2020 and is now structured in two successive phases: an evaluation phase consisting in producing evaluation reports for each evaluated institution within the cluster, then a phase summarising these evaluations for the higher education institution, research and study programme components of the cluster.

2016

First evaluations of study programmes in health

As part of the 2015-2016 evaluation campaign (Group B), Hcéres will be conducting evaluations for the very first time of bachelor’s degree-level general study programmes in medical science, pharmacy, dentistry and midwifery and of master’s degree-level study programmes in medical science, pharmacy and dentistry, as well as the State Diploma in Midwifery.

2016

Review-project evaluation of study programmes for the accreditation of institutions

Further to the provisions of the Law of 22 July 2013 on Higher Education and Research and the Order of 22 January 2014 setting out the accreditation procedures for institutions, the Secretary of State adopts simplification measures. More particularly, he has asked Hcéres to conduct a dual review-project evaluation of the study programmes of institutions for the accreditation of their study programme provision.

**01 / 01 / 2015**

Integration of the OST

The OST was created in 1990 and is joining Hcéres in 2015. The department produces analyses and indicators that contribute to the strategic reflection of stakeholders in higher education, research and innovation, to the evaluations of Hcéres and to evaluations of public policies.

**14 / 11 / 2014**

Decree on the organisation and operation of Hcéres
The creation of Hcéres takes effect on 17 November, the day after the publication of Decree n°2014-1365 of 14 November 2014 on the organisation and operation of the institution.

**Order setting out the accreditation procedures for higher education institutions**

The institution accreditation procedure replaces the approval of degrees. The State will no longer go into the details of the study programmes on offer by approving each degree.

The dialogue between the State and the operators will now focus on training strategy, taking account of the teaching, organisational and financial aspects. In addition to defining its study programme strategy, the institution will also be required to demonstrate its ability to implement it.

**Law on Higher Education and Research and the creation of Hcéres**

Following on from the Forum on Higher Education and Research launched in 2012, the Law on Higher Education and Research was adopted on 22 July 2013.

It creates the High Council for Evaluation of Research and Higher Education (Hcéres) which replaces the Agency for Evaluation of Research and Higher Education (AERES).

› View the Law on Higher Education and Research of 22 July 2013 in french

**Forum on Higher Education and Research**

The Minister for Higher Education and Research launches the Forum on Higher Education and Research. Three themes are being addressed: taking action to foster success for all students, defining new ambitions for research and contributing to defining a new higher education and research landscape. This national consultation will result in proposals providing the basis for legislative, regulatory and contractual measures in early 2013.
Creation of EQAR (European Quality Assurance Register for Higher Education)

Further to the adoption of the European Standards and Guidelines for Quality Assurance in Higher Education (ESG), the Bergen conference (2005) saw the creation of EQAR (European Quality Assurance Register for Higher Education). Its purpose is notably to provide clear, reliable and accessible information on the European quality assurance agencies listed in the Register.

More about EQAR

Creation of the AERES

The Agency for Evaluation of Research and Higher Education (AERES) was created by the Framework Law for Research of 2006 and set up in March 2007. In France, it replaces a number of evaluation institutions: the National Evaluation Committee (CNÉ) for public institutions of a scientific, cultural or vocational nature, the Scientific, Technical and Pedagogical Mission (MSTP) and the National Committee for Evaluation of Research (CNER).

Bergen Ministerial Conference

For the first time, the European ministers have adopted references and guidelines to guarantee quality in higher education and are calling upon the members of the E4 Group (ENQA - European University Association - EUA, European Association of Institutions in Higher Education - EURASHE, European Students’ Union - ESU) to form the EQAR Committee which will oversee compliance by evaluation agencies with the principles that have been set down.

Creation of ENQA (European Network for Quality Assurance in Higher Education)

Further to the recommendation of the European Commission, the European Network for Quality Assurance in Higher Education (ENQA) has set itself the objective of promoting European cooperation in quality assurance. In November 2004, the ENQA General Assembly transformed the network into the European Association for Quality Assurance in Higher Education.
