France maintains a specific scientific profile among the intensive-research countries but sees its performance slipping

Hcéres has published its third report on France’s scientific position in Europe and the world. Covering the period from 2005-2018, it updates the previous observations and adds analysis of a number of different facets: the breakdown by panel of applications to the European Research Council (ERC), a comparison of publications by French Initiatives of Excellence (IDEX) with those from European and American research universities, and the scientific profiles of French regions.
