(COS)**

OST Scientific steering committee (COS)

In order to guarantee the scientific quality of OST production, Decree n°2014-1365 of 14 November 2014 on the organisation of Hcéres endowed the Observatory with a Scientific Steering Committee (COS). The composition and procedures of the COS were adopted by the Hcéres Board at its session of 7 March 2016.

Role of the COS

The COS is responsible for the scientific quality of OST production. It meets at least three times a year to:

- give its opinion on the OST provisional programme of work, in particular with regard to the resources to be allocated,
- evaluate the scientific quality and relevance of planned research and development projects,
- examine the progress of work and results obtained in the course of the year,
- propose the Director of the OST, who is appointed for a 4-year term, renewable once, to the President of Hcéres.

COS Members

The COS is composed of six women and six men chosen by the President of the High Council for their expertise and appointed by him/her further to an opinion from the Hcéres Board. The term of office, including for the President of the COS, is four years, renewable once. Half of the members of the COS are replaced every two years.

Jacques MAIRESSE

Honorary Inspector General at the INSEE, Researcher at the Centre for Research in Economics and

Peter van den BESSELAAR

Professor, holder of the chair in the organisation and dynamics of science (University of Amsterdam)
