Video highlights of the “Research Integrity and Open Science” Conference

Published on 27 May 2019

On 4 April 2019, the French Office for Research Integrity (OFIS) organised a conference in Paris on the theme of “Research Integrity and Open Science”, which was attended by nearly 170 people.

The objective of the conference, organised in partnership with the Conference of University Presidents (CPU), the Committee for Open Science (CoSO), the CNRS and the University of Paris-Saclay Council for Research Ethics and Integrity (POLETHIS), was to share experiences and analyses, identify synergies between research integrity and open science and to identify the pitfalls to be avoided.

The conference produced a wealth of constructive discussions, which can be watched or rewatched in the videos below, and which are summarised in a [dedicated document](#) and in a [summary of discussions](#).
